

Critical to your crane and hoist operation is service support 24/7. for Crane Maintenance & Repairs. Our highly trained technicians specialise in providing comprehensive support for all your lifting equipment needs. Our centre is fully equipped to serve your needs, from rapid response to emergency breakdown, to professional consultancy for new equipment.

GM Technical Services provides a comprehensive range of inspection, maintenance and servicing, flexible to meet with your material handling service needs. Our range of service contracts cover simple inspection and statutory certification to complete lifting equipment management schemes.

All are designed to ensure your equipment is maintained to give you maximum efficiency and long product life. Visits by GM Technical Services qualified technicians for full inspection,

lubrication, fault monitoring, parts replacement, and stock planning maintenance records can be conveniently arranged at predefined intervals.

These intervals may not exceed six months as required by [OHS Act DMR 18.6](#)
